

HOW IT WORKS

Architectural Modular Series

SIGNS WITH STANDARD SPRING CLIPS

- A Spring Clip is a plastic clip inside the sign that holds the Sidelocks in place.
- Standard Option on all complete Signs.
- Sidelocks are marked (L) Left and (R) Right. Install with hooks facing down.

SIGNS WITH TAMPER PROOF LOCK CLIPS

- Plastic Lock Clips sit inside all signs requiring Tamper Proof Locking.
- With the tamper proof version, removal & re-installation of sidelocks is the same as per signs with standard clips with the addition of a tool to unlock the mechanism.
- Tamper Proof option must be specified if required.
