

## How it works.....in simple terms

- **Base Plates** The Base is the back of the sign. This is mounted to the wall or door.
- **Inserts** Inserts - your graphics or text is applied to these. Simply choose the size and quantity of inserts you require for each sign.
- **Sidelocks** Sidelocks are the locking mechanism for the sign. All signs require Sidelocks, one on the left and one on the right. They are available in 3 profiles, 1/16", 1/4", 1/2".

All components in the Architectural Modular Series are made from Aluminum. This includes, the Base, the Inserts and the Sidelocks.
